Hackathon Innovation Track

Team: Aman · Sumit · Anuneet · Janvi

Stage: Working MVP + Beta Users

Seeking: Seed Funding $50,000

THE PROBLEM: WHAT IS MISSING IN TODAY'S PLATFORMS?

ISOLATION & BOREDOM

- Quizzes feel like boring forms
- No real-time competition
- Users drop in minutes
- No excitement or rivalry

BROKEN SYNCHRONIZATION

- Timers can be manipulated
- Fast users get unfair advantage
- No server-side control
- Cheating is easy

ZERO RETENTION HOOKS

- No streaks or XP
- No shareable results
- No community or teams
- No deep analytics

THE MARKET GAP

- Kahoot = fun, not serious
- Google Forms = static & boring
- LMS = complex & expensive
- No platform does all 3:
  - Real-time
  - Engaging
  - Fair

The global EdTech market is $404B and growing at 16% YoY. No platform has solved synchronized, fair, engaging assessment at scale. This is our entry point.
